## ENGINE & TRANS MOUNTS

Beck/Arnley Mounts have the EXACT Form, Fit, and Performance of OE! Whether it is vacuum or non-vacuum, electric or non-electric, solid or hydraulic, Beck/Arnley goes to special lengths to match the OE application on every engine mount. Many competitors consolidate parts so that they fit multiple applications, Beck/Arnley's objective is different. We want the mount that came off of the vehicle to look like the one that is in our box. Not every mount is made the same, and we know that.

5 TOP 5  
PRODUCT

Part # 104 - 2050

### Honda Odyssey (05-07) Rear Mount

- Mount has integrated sensor to fluctuate hydraulic presser at certain speed intervals.
- Spark created by sensor signals the hydraulic pressure for a tighter ride.
- Hard to find part in the aftermarket. Typically only available through the Dealer.

# WHY CHOOSE Beck/Arnley Motor MOUNTS

### COVERAGE -

Beck/Arnley has incredible coverage on engine and transmission mounts for import vehicles. Not only is Beck/Arnley's coverage deep, it is quick and responsive. Beck/Arnley prides itself with being one of the first to market with new part numbers and carry-up coverage.

### OE QUALITY -

Even though Beck/Arnley has incredible coverage, we don't sacrifice quality for the coverage or cost. If the OE is a vacuum specific mount, we supply that part as a vacuum mount. If OE is hydraulic, we supply the part as a hydraulic. Our mounts are application specific and type specific. We don't cut corners to supply something that just "will do." We supply the part that has the same form, fit, and function of the OE.

### PRODUCT KNOWLEDGE -

Beck/Arnley studies every mount for every import vehicle to make sure that the mount we supply is the RIGHT mount - no questions asked.
